Subject: RE: Design question.

Kevin –

We really do try to do a cold proof read on all the documents. The drawing should have stated “Excavated material to be used as fill in sitewide grading and grubbed vegetation to be placed in RA-F and covered with slag.”

I’m assuming we can address this in response to comments and final design drawings for site wide grading. Please advise if you want a correction in advance of that.

Subject: Design question.

Barbara,

On Page 10 of the drawings which cover excavation of RA-J. The note states that grubbed material will be placed on RA-J and covered with slag. That would actually defeat the purpose for the excavation and so I am assuming that the drawing should refer to another location for grubbed material. Please advise.

Kevin
